Defining a legal Bat: **A single-wall bat is to be composed of one continuous, single shell or layer composed entirely of the same material without the use of any type of glue or bonding system with a BPF no greater than 1.20.** Any bat that is more complicated than this definition is considered a multi-wall bat. All current composite bats are constructed using multiple layers and therefore considered Multi-wall bats.

***Bats will NO LONGER be approved by specifications only. I must see the bat to consider adding it to the list. UMP&R reserves the right to remove any bat from this legal list at any time should it be determined to be outperforming other single-wall aluminum bats.**
